### **Annual Report 2021-22**

Science Society of Government PG College for women, Rohtak remained active throughout the year under the convenorship of Dr. Veena Sachdeva and members.

The COVID-19 pandemic made the world realize things that were actually important for the survival of humankind. For instance, people learnt the importance of helping each other for the better functioning of society. As the world fights one of the biggest health challenges in human history, it has brought a sharp focus on the role of science in society. Our goal was to introduce science to everyone by emphasizing the importance of science in our daily lives. The pivotal role and theme of science society GPGCW that was rejuvenated and fuelled in the pandemic in the year 2021-22 was "Science is key to understanding our world, from #COVID19 to the causes of the climate emergency."

We celebrated World Environment Day (June 5, 2021) to spread awareness about the threat to the environment due to rising pollution levels and climate change and to encourage awareness and action for the protection of the environment on Online mode due to Covid-19 restrictions. We organized an online plantation contest on June 5, 2021 where the participants had to use any waste containers; convert the same into a planter; plant a plant into it and click a selfie with plant and planter. Participants converted a variety of waste articles into planters and learnt "RECYCLE REUSE AND REDUCE" and the planet to heal as they also learnt plantation. A total of thirty-one participants participated in this contest.

**"The care of the Earth is our most ancient and most worthy, and after all, our most pleasing responsibility."**

We aimed to ensure our students kept informed of developments in the world of science in understanding the planet and in ways societies can be made more sustainable and fulfill the purpose, On November 22, 2021; Science society organized an Inter Class Poster Making Competition and an Inter-Class Slogan Writing Competition on the following topics.

- Let's Thank Our Healthcare Workers
- Largest Vaccination Drive
- Ayurveda for Immunity
- Awareness, cleanliness and social distance are wonder tools to prevent corona infection
- Self Help for Good Health: A Naturopathy Perspective
- Vaccine Program

A National Webinar Science Society in Collaboration with IQAC was organized on the occasion of World Health Day, April 7, 2022, highlighting "Preparing for a Post-COVID Future", "Coexisting with COVID-19" and "Vaccines & Variants" Dr Dhruva Chaudhry, State Nodal Officer, COVID-19 and Sr. Professor & Head Department of Pulmonary & Critical Care Medicine, Pt. BDS Post Graduate Institute of Medical Sciences (PGIMS) guided, informed and extended insight through the webinar for clarifying various issues related to "COVID-19", and other health related issues. A total of 246 participants attended the webinar and were given e-Certificates. Furthermore, hundreds of participants joined on Facebook live.

Every year on May 22, to celebrate natural diversity and to spread awareness among students and masses, the international biodiversity day is celebrated globally. The theme for this year 2022 is: "Building a Common Future for All Life", which itself explains: each species is a masterpiece and has its own niche in

the biome. Biodiversity is essential for achieving the Sustainable Development Goals, ending the existing threat of climate change, food security and human health. The world is still battling the corona virus pandemic, so the option to live sustainably should be made available to everyone. Therefore, a healthy planet is critical to achieving the Sustainable Development Goals. We are depleting resources faster than nature. COVID-19 Pandemic, has reminded us of the close relationship between people and nature.

To create awareness of the above, a two-day workshop (on February 19-20, 2022) on poster making on the theme of International Biodiversity Day and an exhibition (on February 21, 2022) was organized where more than 50 students exhibited their views on the importance and significance of biodiversity. The Chief Guest of the program, Professor and Head Vinita Shukla, Department of Zoology MDU Rohtak, said in her statement, "It is estimated that 100000 species may become extinct by 2050 if the current trends continue. International Day for Biological Diversity raises awareness and calls for action to protect our planet's biodiversity. Such celebrations and programs not only create awareness among students about the diversity of plants and animals and micro-organisms, but also the exploration of the relationship between nature, biodiversity, ecosystem services and human health and well-being.
