E-mail

# E-mailing

The growth of information technology over the past thirty years has culminated in the modern form of communication. The Fax, E-mail, video conferencing, voice mail etc. some of the modern forms of communication.

## 1. First Stage :➡

In the first stage of business communication a business man used to have oral communication with small groups, face to face.

## 2. Second Stage :➡

In the second stage the business communication grew along with oral and written communication in the form of telephone, newspaper, radio, television etc.

## 3. Third Stage :➡

Modern state of communication development refers to the third. In this stage, modern techniques of communication are being as a medium of communication, such as computer, internet, e-mail, voice mail etc.

# E-mail...

E-mail refers to message sent over computer and includes everything, from casual notes to friends to multimedia presentations sent across the world.

---

E-mail refers to communication transmitted through computers. Electronic Mail (E-mail) lets you send a message to a person without your making direct contact or knowing where that person is located.

Subscribers to electronic mail services are called users, and as a user, you can access messages on your system from your home, office, hotel or anywhere you happen to be.

- (•) Several basic components make up E-mail systems, including users, messages, senders and recipients, addresses, protocols, messaging etc.

# Uses Of E-mail

1. Combines the characteristics of writing and speaking: ✦ E-mail combines some of the characteristics of writing and speaking. As a user, you have the urgency of communicating directly to your receiver, along with the advantages of being able to compose and revise a written message.
2. Useful in Personal Communication: ✦ E-mail is also useful in your personal communications. You can communicate with friends and family anywhere in the world. And because many universities give free e-mail account to their students and employees, you can keep in touch with your friends without having to make an appointment for a telephone call.
3. Informal approach: ✦ Writing conventions for e-mail are still developing but one characteristic appears to be a informal approach. Most business people handle their own E-mail and because most of their messages are read only and not printed on paper, they tend to drop the formalities of traditional correspondence.

# How E-mail works?

1. To send an e-mail message :-

- Log on. This means connecting to a computer network of e-mail programme. It requires the user's name and a password.
- Choose the receivers of your message. For this step, you need to know the e-mail address of your recipients.
- Compose the message.
- Instruct the programme to send the message.

2. To read your e-mail message :-

- Log on.
- Look at a list of your new e-mail.
- Choose the message you want to read.
- Handle the current message by deleting, storing, printing, forwarding or replying.
- Continue to read your message.

# Advantages of E-mail

1. Transmission of message is almost instantaneous.
2. Messages are often more personal and informal.
3. Compared to telephone calls, the problem of "telephone tag" is reduced or eliminated.
4. The time necessary for meeting is reduced.
5. Electronic mail can replace many memorandums and routine letters.
6. Electronic mail can be sent at any time, day or night, thus decreasing costs and problems brought about by differences in time zones.
7. Message can be sent to many receivers simultaneously.

# Disadvantages Of E-mail

1. Cost. (Depending upon company needs, systems can be cost effective.)
2. Because e-mail messages are prepared more quickly than most letters and memorandums, senders are more likely to make errors in facts and approach, in addition to errors in logic, grammar, and spelling.
3. Incompatibility of electronic mails systems prevents the sending and receiving of messages between these systems.
4. The sender of the message has no assurance that the intended receiver will check his or her mailbox or respond to the message.
5. E-mail messages may be taken less seriously than traditional business letters.

# Guidelines For Writing E-mail

## Communications

- ➔ Although an e-mail feels informal, it is not private, as a conversation might be. Your employer may legally check your message. A message sent to one person can be printed out or forwarded to others without your knowledge or consent.
- ➔ All the principles of good business writing still apply with e-mail. Remember your attitude and positive emphasis. Use readers' benefits when they are appropriate.
- ➔ Because e-mail feels like talking, some writers give less attention to spelling, grammar and proof reading. Many e-mail programmes have spell checkers; use them.
- ➔ Reread and proof <sup>read</sup> your message before sending it out.
- ➔ E-mail messages have to interest the reader in the subject line and first paragraph. If the message is longer than one screen, the first screen must interest the reader enough to make him or her continue.

# E-mail Etiquette

Because e-mail is fairly immediate and generally less formal than other forms of written communication, you may be tempted to relax the tone, organisation and content of your message.

Remember the following:-

- Watch your tone. Because of the conversational aspect of e-mail and the fact that you are sitting in privacy, you may be tempted to be too casual.
- Be concise. Long rambling messages are just as ineffective on e-mail as they are in print.
- Forward the e-mail to the appropriate address if you receive a message that was not meant for you. You also alert the sender that the message was sent to the wrong address.
- Be polite. Even when you are communicating with a group of users you have never met, you should not get involved in "flame" war.

# Conclusion

We can conclude with Murphy, Hildebrandt and Thomas that:

Managing information inside and outside organisation has become one of the major concerns of business.

Technological development are, to a large extent, responsible for the transformation of today's world into a global village with all its accompanying problems. Effective communication has never been more important on a national, international, organisational and personal level.

Thank you...

Question-1. Explain mechanism of decision-making.

Question-2. Discuss in brief the steps involved in a planning process.

Answer-1. The process of decision making is divided into two parts.

Traditional process :-

In this process, a manager take decisions on the basis of their limited knowledge, experience & assumption and no finite process is followed.

Scientific process :-

In this process, a manager follows an established process from the beginning of the final result.

These two mechanism plays a vital role in the decision-making which further helps in the development & enhancement of the company.

## some Mechanisms

Defining a problem

Analysing a problem

Development of Alternative

Evaluation of Alternative

Selection of best Alternative

Execution of decision

Follow-up

## Explanation

1. Defining problem - It is the first form of decision-making. In this it is important to obtain information about the problem for which a solution is to be sought.

The cause of problem is known as strategic or limiting or critical factor.

2. Analysing a problem - It is the second form of decision making

After having defined the problem, the manager must analyse it. It is decided by the manager whether the information will be required in the connection with the planning and from where this information can be gathered.

Developing the alternative :-

There can be many alternative for the solution of a problem. If there is one method of solution of problem no need to take decision because the method is itself a decision.

Evaluation of alternative :-

Evaluation of should be made with reference to time and capital and only the best alternative should be selected which is more beneficial in the economical section of the community.

Selection of best alternative :- It is impossible to implement decision and find out the its results.

Execution of decision :- It includes three parts :-

- Effective communication :- In this mechanism person will have to transfer into reality. It is important for decision-making.
- Securing employee's acceptance :- It is very important to consult with employees while developing any different alternatives.
- Correct timing of decision execution :- The decision should be executed in a congenial atmosphere and there should not be any fear of opposition.
- Follow up :- It is the last step in decision making. As decision implemented, result start pouring it.

Answer 1.2 Planning :- It is the basic form of management.

It is the process to determine what is need to be done in the advancement of a company.

## Steps involved in the process of planning

- Establishing objectives.
- Making a forecast.
- Determining the planning periods.
- Having perception of opportunities.
- Searching for different alternatives.
- Evaluation of alternative.
- Selection of best alternative.
- Implementation of plans.
- Renew of plans.

1. Establishing objectives :- It is very much important to establish a certain ~~or~~ objective before starting any work. If we don't have objective, we cannot run business.

2. Searching for different alternatives :- First of all, it is necessary to find a ~~best alternative~~ different alternatives ~~or~~ which can ease the work by taking less time.

3. Having perception of opportunities :- It is very much important in planning to have a perception of opportunities in the development of the company.

4. Renew of plans :- It is very much necessary to renew the plans according to the surrounding.

5. Searching for different alternatives :- Among many alternatives, it is important to search good alternatives which helps in the enhancement of company.

6. Selection of best alternative :- Among many alternative, one should find the best alternative so that the work can be done fastly. It is impossible to implement decision and find out its results.

7. Evaluation of alternation :- Time to time evaluation of alternative is done. evaluation should be done with reference to time and capital. Only the best alternative should be selected which is more beneficial in the economical section of the company.
